

ZJIC-E-203G

Unmanaged DIN-Rail FE/GE Ports Converter from Electric to Optical

Description

ZJIC-E-203G is an industrial FE/GE ports converter from electric to optical. It offers power supply redundancy, wide supply voltage range and operating temperature, overload protection, reverse polarity protection, anti-electromagnetic interference ability. It can be deployed in the harsh industrial environment.

Features

- ★ FE/GE (SC/ST/FC/LC) available
- ★ Power supply redundancy, overload and reverse polarity protection are available
- ★ Operation temperature: -40°C ~ 75 °C
- ★ IP 40 Classification, , metal shell
