

ZJBAS 1500 Multiplexer

Description

ZJBAS1500 is a high capacity multifunction multiplexer, which integrated digital, analog, DXC ,PDH and SDH function in one platform, providing POTS, 2/4W EM, Ethernet, RS232/485, E1, PDH and STM-1, easy to access transmission network by E1 or STM-1. The ZJBAS 1500 product portfolio involve ZJBAS1500-10/1500-40/1500-20, which meet different requirement of client .

Features

- ★ High reliability: MCUS(Control Unit) and Power supply 1+1 hot swap; Data backup ,on line testing and Loop back are available.
- ★ Cross connect capacity DXC (1/0): 2048X2048TS or 4096X4096TS,
- ★ Type of cross connect: Unidirectional , bidirectional and broadcasting
- ★ Topology application: point to point, point to multi-points
- ★ Relay interface: STM-1,PDH(o) and E1
- ★ Audio and singling: 2/4W EM, FX0/FXS
- ★ Data interface: Co-direction 64K(G.703), RS232/485, V.35 and Ethernet and G.HDSL
- ★ Easy operation and maintenance: Board hot plug in is available, board on line upgrading as well.
- ★ Flexible management mode: The nodes be found automatically based on dynamic routing protocol , which can be managed by the ZJNManager.
